Product Designer | 3D CAD Modeling | Physical Product Development

PROFILE

Industrial Design graduate with a strong foundation in 3D CAD surface modeling, physical product development, and design for manufacturability. Experienced in SolidWorks and Fusion 360 across a range of consumer product and structural design projects, with a consistent focus on how designs translate into real, buildable objects. Comfortable working across the full product development cycle from concept through to prototyping and physical validation. Trilingual (English, French, Arabic) with an active federal Reliability Status security clearance.

SKILLS

CAD & Modeling: SolidWorks (surface and solid modeling), Fusion 360, AutoCAD, complex 3D geometry, part assemblies, technical drawings

Design for Manufacturing: Material selection (plastics, metals, composites), part splitting, draft angles, life cycle analysis, sustainability considerations, 3D printing

Product Development: Concept development, prototyping, physical validation, design reviews, iterative refinement, technical documentation

Design Tools: Adobe Illustrator, Adobe Photoshop, Adobe XD, Figma, Premiere Pro

Productivity: MS Office Suite (advanced), Google Workspace, GCdocs

Languages: English & French (PSC SLE: CCC), Arabic, trilingual

Clearance: Reliability Status (active)

EDUCATION

Bachelor of Industrial Design Sep 2015 – Apr 2020

Carleton University, Faculty of Engineering and Design • Ottawa, Ontario

Focused on 3D CAD modeling, physical prototyping, design for manufacturability, material science, ergonomics, and product life cycle analysis. Completed an advanced computer modeling course with dedicated SolidWorks training and physical 3D print deliverables.

AWARDS & RECOGNITION

- 2nd Place, 3D Hubs x Gillette 3D CAD Design Competition (2019): Designed and modeled a precision consumer product handle in SolidWorks, competing internationally against engineering and design students. Recognized for geometric accuracy, surface quality, and manufacturability.
- ACIDO Rocket Award, Finalist (2020): National award recognizing outstanding graduating industrial design students across Canada.
- Professor Book Award (2020): Faculty recognition for academic excellence and design achievement.
- Dean's Honour List (2019–2020): Top academic standing, Faculty of Engineering and Design.

DESIGN PROJECTS

Toyota Key Fob Body Enclosure • *SolidWorks, 3D Printing*

Reverse-engineered and modeled a full body enclosure for a Toyota key fob using SolidWorks surface and solid modeling tools. Project required accurate replication of complex organic geometry, proper part splitting, and a final 3D-printed physical output validated against the original.

3-in-1 Kitchen Appliance (Slow Cooker, Waffle Maker, Grill Press) • *Fusion 360*

Designed a multi-function kitchen appliance from concept through to detailed CAD model. Research included material selection, manufacturing process planning, and life cycle analysis to ensure the design was practical, sustainable, and production-feasible.

Wobbly Blocks, Modular Game Board • *Fusion 360*

Designed a complete modular game board system in CAD, balancing geometric precision with physical playability. Included component assembly design and consideration of how parts would be manufactured and assembled. Full project available in portfolio.

Abstract Heart Sculpture, Album Cover Art • *Fusion 360*

Designed an abstract 3D sculptural form featuring complex curved geometry and a through-arrow element, modeled in Fusion 360 and translated into final production artwork.

WORK EXPERIENCE

Industrial Design Intern Nov 2018 – Sep 2019

Oneid Engineering / Portal 724 • Ottawa, Ontario

- Drafted design proposals and technical reports for client stakeholder presentations.
- Created floorplans and CAD models to support renovation and large-scale space planning projects.
- Conducted site visits, took precise measurements, and documented findings to inform engineering and design teams.

Co-Founder, Head of UX and Operations 2024 – Present

GetExpanded, Airway Healthcare Provider Directory • Ottawa, Ontario • getexpanded.org

- Co-founded and helped design a healthcare directory platform, leading user experience design, market research, and platform growth strategy.

Program Support Officer (Indeterminate) Oct 2023 – Present

Accessibility and Inclusivity Office, Public Services and Procurement Canada • Ottawa, Ontario

- Co-developed the GCWorkplace Accessibility and Inclusivity Guide for the Built Environment, applying inclusive design principles and structured research to shape real physical workplace environments.
- Led stakeholder consultations, facilitated working sessions, and delivered bilingual presentations across the branch.

Founder and Creative Director Nov 2021 – Present

Moreso Digital • Ottawa, Ontario

- Founded and operate a content marketing studio delivering brand identity, graphic design, and video production for clients.

Contract UX/UI Designer May 2019 – Jul 2019

LISN, Podcast Application (Startup) • Ottawa, Ontario

- Created wireframes, prototypes, and conducted user research for an early-stage podcast application.

Field Support Network Agent Apr 2021 – Sep 2021

Elections Canada • Ottawa, Ontario

- Provided nationwide technical support under tight deadlines; documented cases and generated management reports.

Customer Service Representative Jan 2017 – Dec 2024

Routhier Community Centre, City of Ottawa • Ottawa, Ontario

- Delivered frontline client service including registrations, bookings, and issue resolution.
